

BRAND GUIDELINES

Vanessa Stoykov

INTRODUCTION

The Vanessa Stoykov brand identity has been designed to align with the way she communicates with her audience.

The most important visual identification devices are the logotype, colours, typeface, graphics and photography which together form the foundation of the brand identity.

This brand guidelines document introduces each of these components and provides guidance for using them effectively. The correct and accurate implementation of the elements described will create a consistent visual presentation of the Vanessa Stoykov brand identity.

01

STRATEGIC OVERVIEW

Campaign	LET’S GET REAL ABOUT MONEY
Tagline	COURAGEOUS CONVERSATIONS
Purpose (why?)	To give people the confidence to be more open and take control of their own financial wellbeing, for a healthier, happier and more secure future
Mission (how?)	By changing the way people talk, think and learn about money.
Offer (what?)	Through empathy and the opening of doors, I connect everyday Australians to the financial world.
Brand Pillars	Big picture thinking CHOOSE LIFE Decide what matters most to you, and I'll help you find a way to fill your life with it. Good humour APPROPRIATELY INAPPROPRIATE It's ok if the 'F' word scares you; finance can be intimidating. I'll help you see the lighter side and take control. Engaging storytelling HUMANISING FINANCE I create connections through storytelling, championing the needs of everyday Australians. Future thinking CREATING A BETTER FUTURE I help people align their actions with their innate values and beliefs values.
Brand Values	Authenticity KEEP IT REAL Family-focus NURTURE CONNECTION Caring spirit GIVE GOOD ENERGY Liberation EMBRACE FREEDOM

Customer value proposition
FOR CONSUMERS People are reluctant to talk about money. It can hold them back. Vanessa brings conversations about true worth, personal goals and finances out in the open, sharing insights and ideas in an everyday accessible format that can make a big difference to people’s wellbeing.
FOR BUSINESSES The wellbeing of your people and customers is crucial to build engagement, cement loyalty and drive productivity. Whether it’s inspiring your team, or connecting with your customers, Vanessa’s take on financial wellbeing sparks courageous conversations with the power to make a difference.

LOGOTYPE

LOGOTYPE

This is the Vanessa Stoykov logotype. It communicates Vanessa's first name and surname in a handwritten style which pays homage to the storytelling nature of her services.

The logotype should never be rearranged or redrawn, as the exact reproduction is essential in maintaining the integrity of the brand.

The image shows the logotype for Vanessa Stoykov, which is a handwritten signature in a dark blue ink. The signature is fluid and cursive, with the first name 'Vanessa' and the surname 'Stoykov' written in a single, continuous stroke. The letters are connected, and the overall style is elegant and personal, reflecting the 'storytelling nature' mentioned in the text.

CLEARSPACE & MINIMUM SIZING

Clearspace

Clearspace is essential in maintaining the clarity of the logotype. The minimum clearspace is equivalent to the width of the lower-case 'v' in the logotype.

This space must not be encroached upon by typography, graphics or artwork edges. The only exception to this rule is when the logotype is anchored to the bottom of headlines.

Minimum size

The logotype should not be reduced to sizes smaller than:

- 50mm in width for print applications,
- 160px in width for digital applications.

Compliance with these minimum widths will avoid distortion and impaired legibility.

COLOURING THE LOGOTYPE

The logotype is to only appear in the colours to the right with the Legacy Blue and White versions of the logotype being preferred.

The black version is to be restricted to occasions when colour output is unavailable.

ANCHORING THE LOGOTYPE TO HEADLINES

The logotype may be anchored to the bottom of headlines. When doing so it is important to ensure that no more than 20% of the logotype covers the headline.

When selecting colours for this type of application, choose a version of the logotype which contrasts most with the colour of the background. The logotype should never exist in the same colour as the headline or be positioned behind the headline.

SOCIAL AVATARS

These are the Vanessa Stoykov social avatars. They consist of the 'V' from the logotype on a Legacy Blue background.

The social icons should only be used for profile pictures on social media applications and should never attempt to replace the logotype in other communications.

03

COLOUR

PRIMARY COLOUR

Legacy Blue is the brand’s primary colour and should be used to colour all typography when designing digital communications.

Print documents
Black (K100) is to be introduced for bodycopy and small text when applying the brand to printed documents.

Legacy Blue

Digital

RGB0 30 96
HEX001E60

Print

CMYK100 81 0 51
PMS2757 C

SECONDARY COLOURS

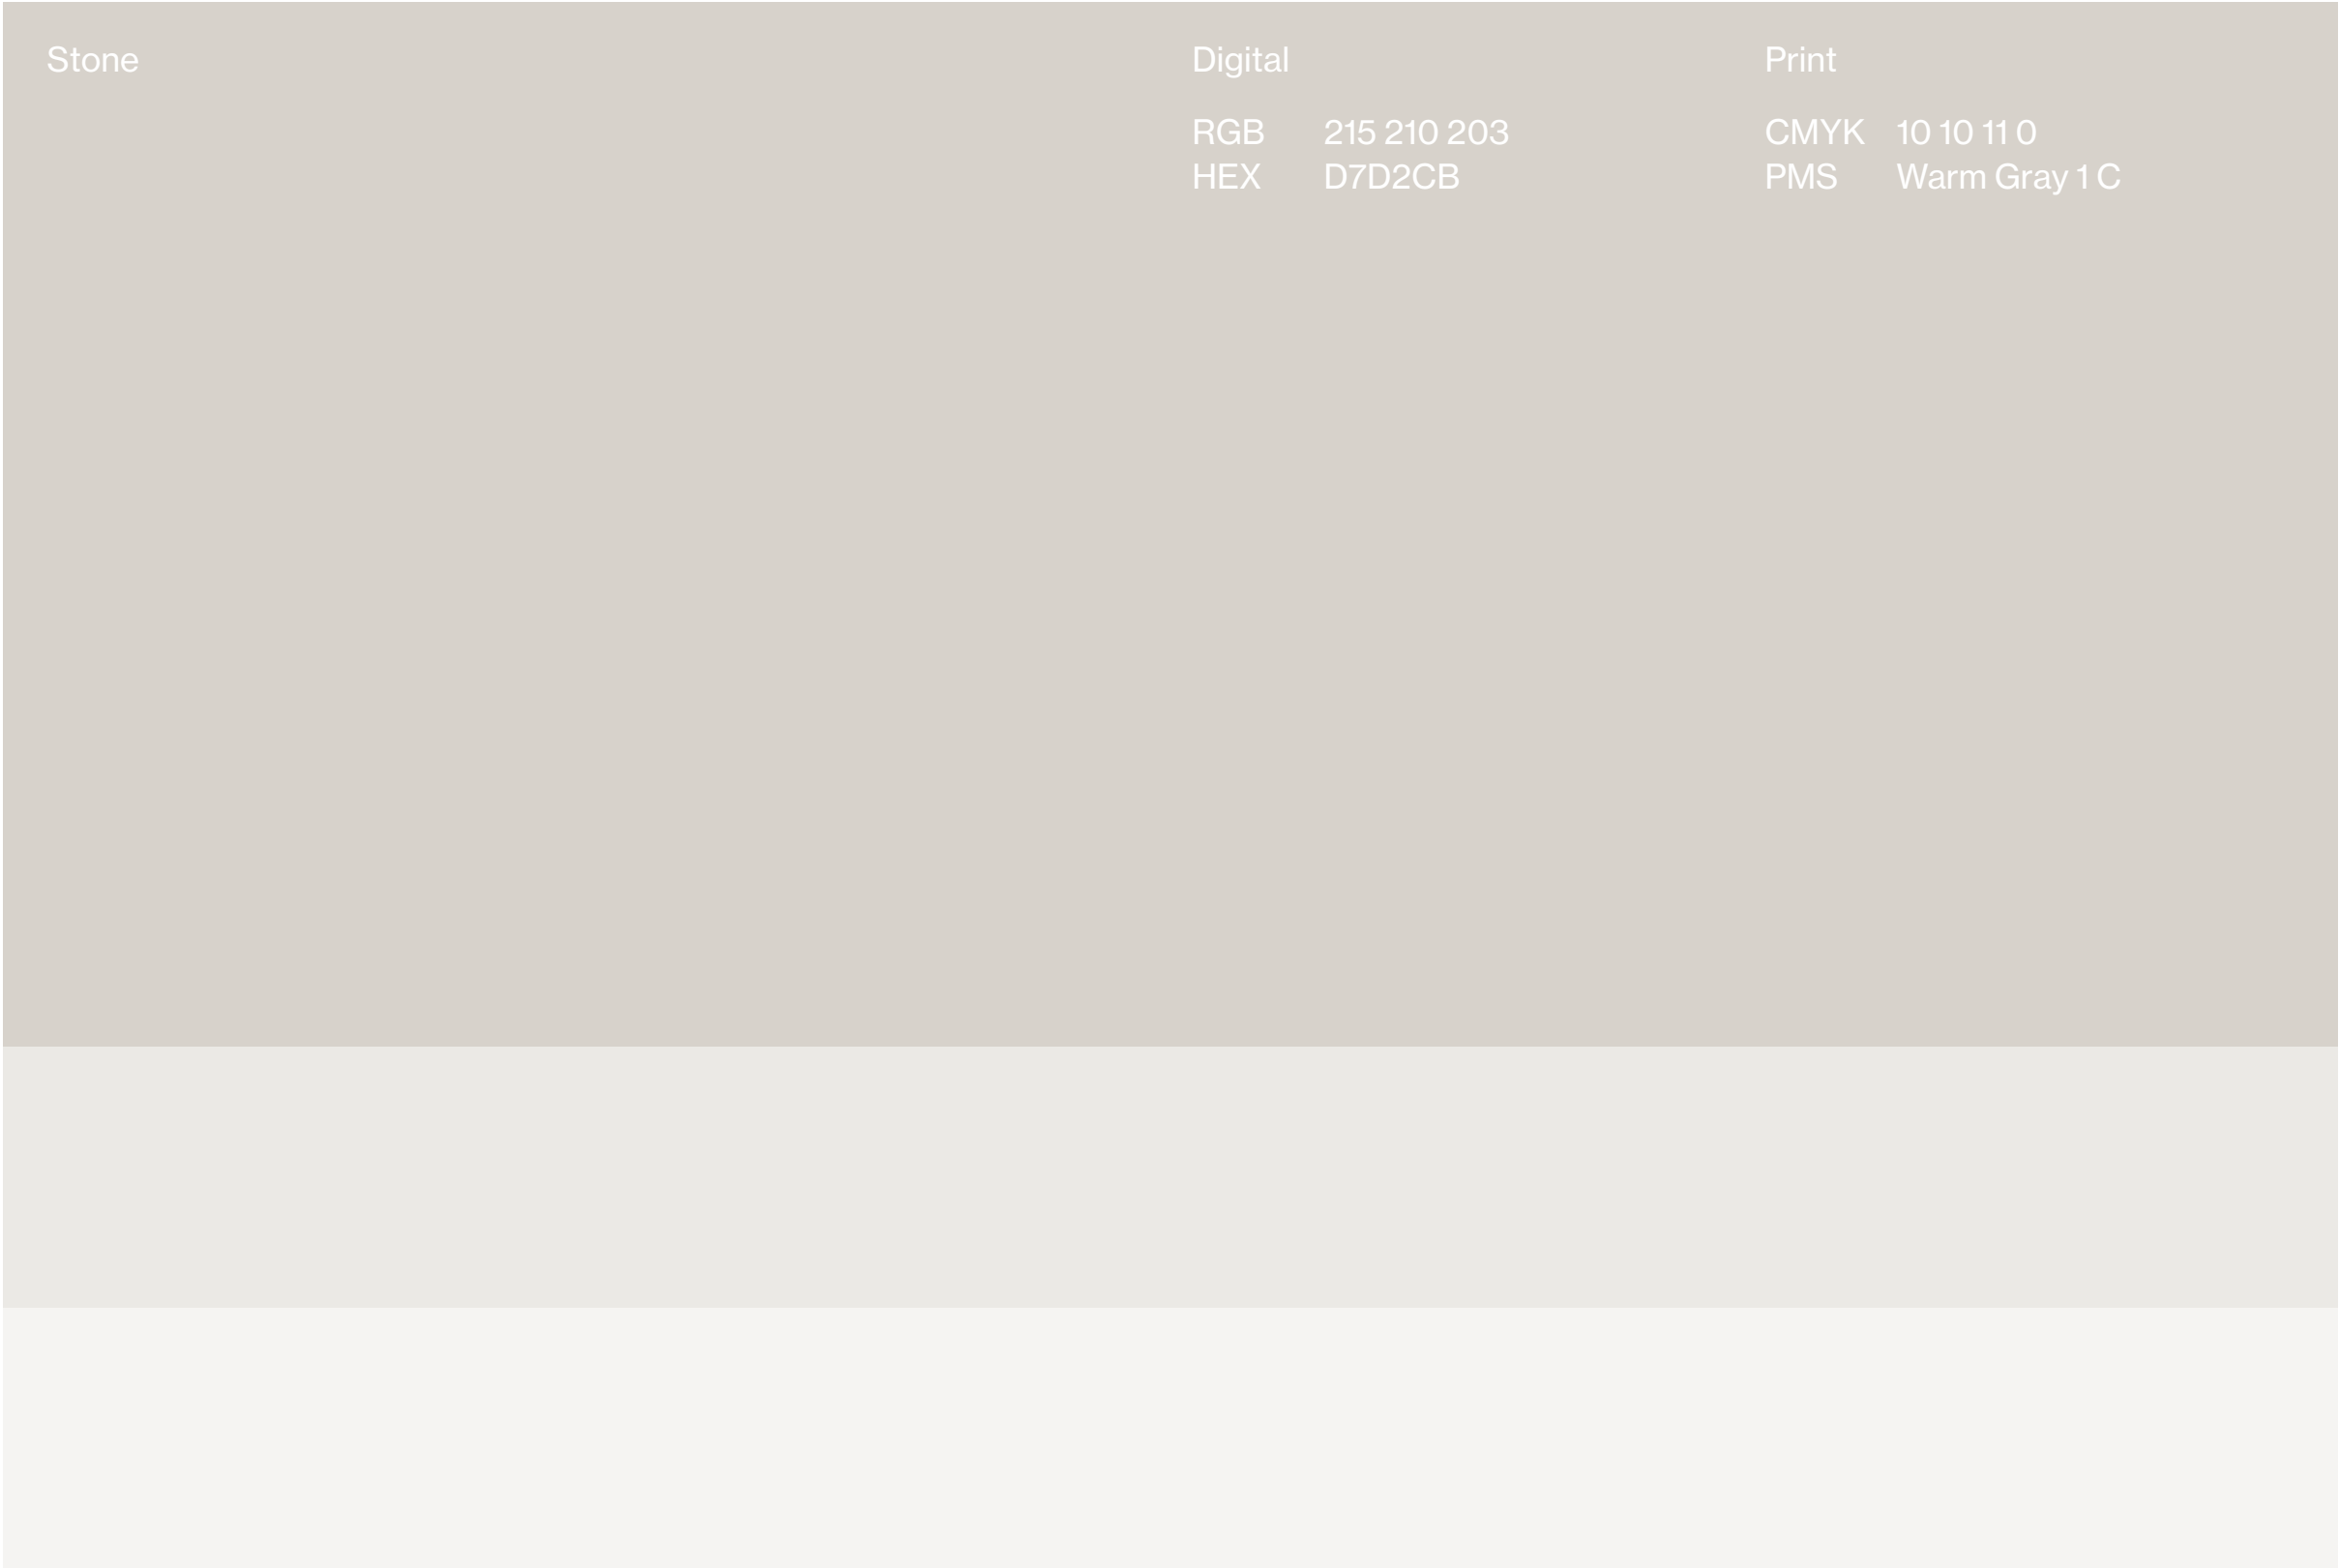

Light Blue, Gold and Pink are the brand's secondary colours. These may be used to colour headlines but are never to be used for bodycopy or small text.

Apart from graphs and charts, secondary colours should never be combined with one another.

Light Blue	Digital	Print
	RGB138 186 221	CMYK45 9 3 0
	HEX8ABADD	PMS3577 C
Gold	Digital	Print
	RGB255 184 28	CMYK0 25 94 0
	HEXFFB81C	PMS1235 C
Pink	Digital	Print
	RGB240 148 145	CMYK0 49 28 0
	HEXF09491	PMS2339 C

FUNCTIONAL COLOURS

Stone has been selected as the brand's functional colour. It is to be used only when necessary for elements which require subtle differentiation from white. These may include backgrounds, table rows and shadows. Tints of the Stone may be applied to achieve a desired effect.

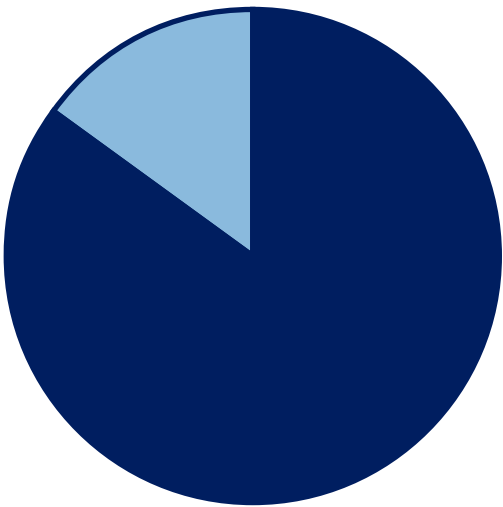

COLOUR HIERARCHY

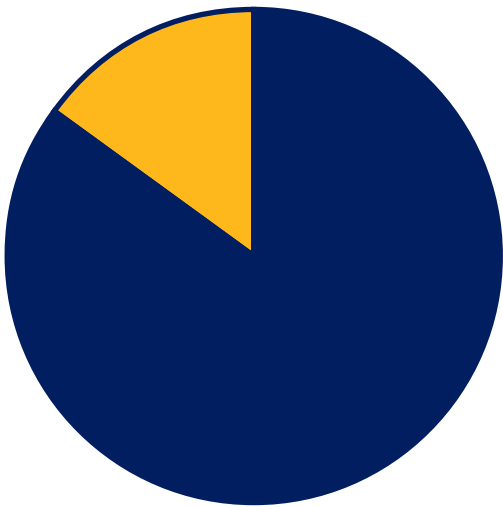

Business-to-Business (B2B)
When designing B2B communications, Legacy Blue is to be the most prevalent colour used for backgrounds, graphics and photography. Legacy Blue is to have ~85% dominance over secondary colours in this context.

Business-to-Consumer (B2C)
When designing B2C communications, the secondary colours are to be the most prevalent colours used for backgrounds, graphics and photography. The secondary colours are to have ~85% dominance over Legacy Blue in this context.

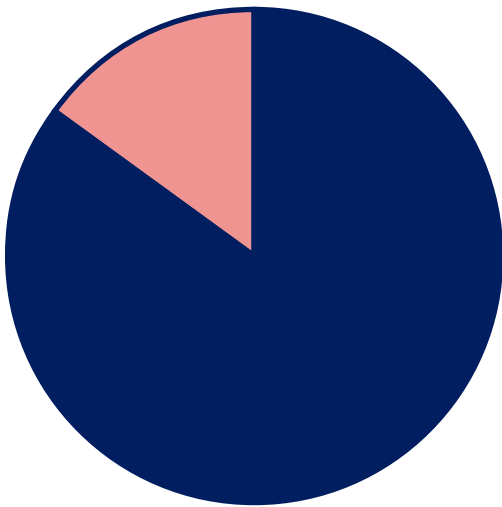

Business-to-Business (B2B)

04

TYPOGRAPHY

PRIMARY
TYPEFACE

Bebas Neue has been selected as the primary typeface. It is a bold, confident font which is to be set in capital letters and used for headlines.

Bebas Neue can be downloaded for free from fonts.google.com.

Bebas Neue

ABCDEFGHIJKLMNOPQRSTUVWXYZ
!?\$%&'()*+,-./:;<=>@#%0123456789

ABC

SECONDARY TYPEFACE

Neue Haas Grotesk has been selected as the secondary typeface. It compliments Bebas Neue and is to be used for bodycopy, introductions and pullouts.

Neue Haas Grotesk can be purchased from myfonts.com.

Neue Haas Grotesk Text – Roman

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
!?"\$%&'()*+,-./:;<=>@#%
0123456789

Neue Haas Grotesk Text – Bold

ABCDEFGHIJKLMNOPQRSTUVWXYZ
abcdefghijklmnopqrstuvwxyz
!?"\$%&'()*+,-./:;<=>@#%
0123456789

A b c

TYPEFACE USAGE

In order to maximise brand recognition, it is important to style typography in a consistent manner. To the right is an example of our messaging hierarchy.

Headlines

Headlines are set in Bebas Neue and should always be most visually prominent piece of messaging. The are to be short and punchy, and should not exceed 4-5 words per line.

Introductions & pullouts

Introductions and pullouts are to be set in Neue Haas Grotesk Text Roman. They should always be significantly larger than bodycopy and where possible have 5-7 words per line.

Bodycopy

Bodycopy is to be set in Neue Haas Grotesk Text Roman and where possible, have 7-10 words per line.

Neue Haas Grotesk Text Bold is to be used for bodycopy headings. These are to be set at the same point size as the bodycopy. If more visual emphasis is needed, Bebas Neue may be implemented.

Headline

COURAGEOUS
CONVERSATIONS

Introduction / pullout

Courageous conversations can inspire, inform, build confidence, influence, and ultimately help people create better relationships – with their finances, and each other.

Bodycopy

Overview

People are reluctant to talk about money. It can hold them back. Vanessa brings conversations about true worth, personal goals and finances out in the open, sharing insights and ideas in an everyday accessible format that can make a big difference to people’s wellbeing.

05

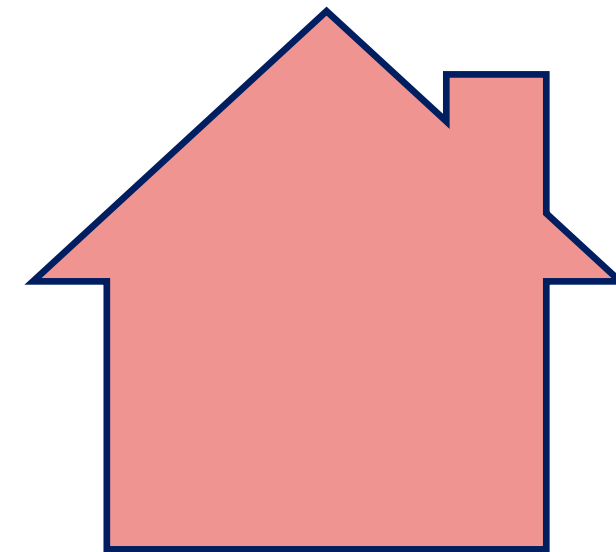

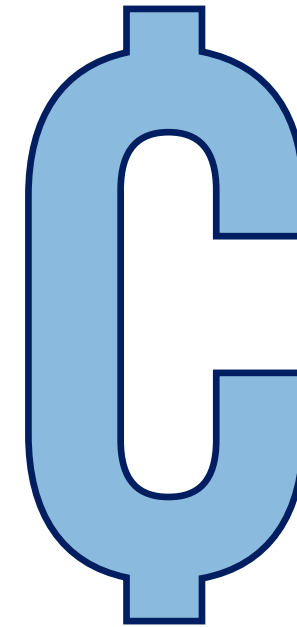

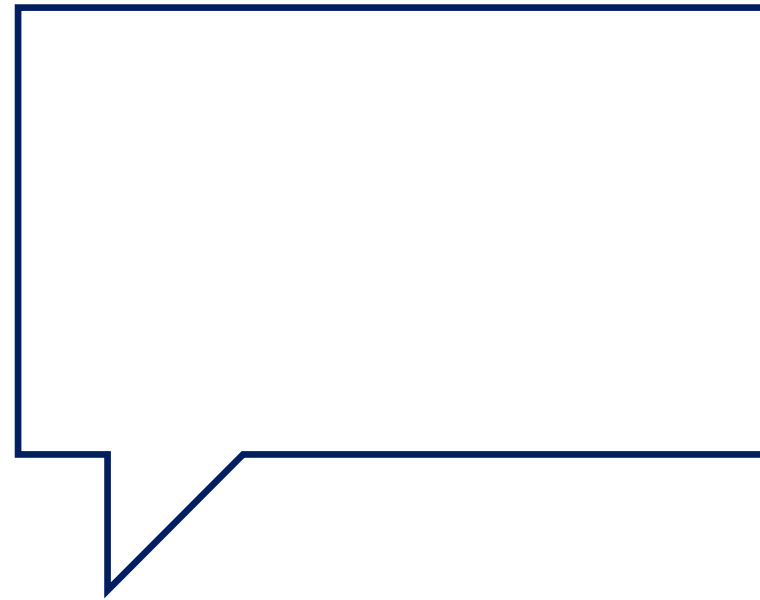

GRAPHICS

ICONOGRAPHY

Icons play an important role in aiding text to deliver a story.

Icons can be created from glyphs and symbols within the Bebas Neue character set or from simple silhouettes of objects related to a communication's content.

Their keyline may be styled in Legacy blue or a secondary colour. Legacy Blue, secondary colours or white can then be used to colour the inner space. Multiple secondary colours should not exist within the same icon.

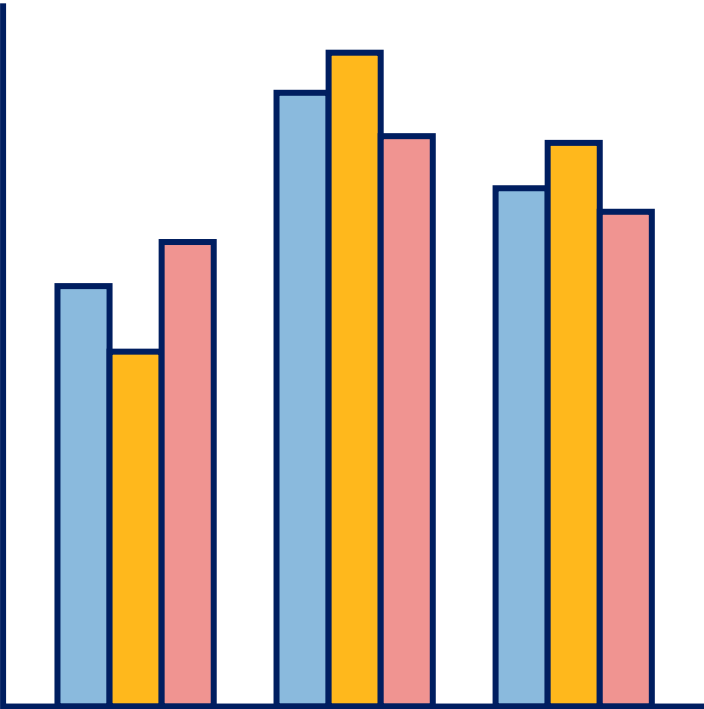

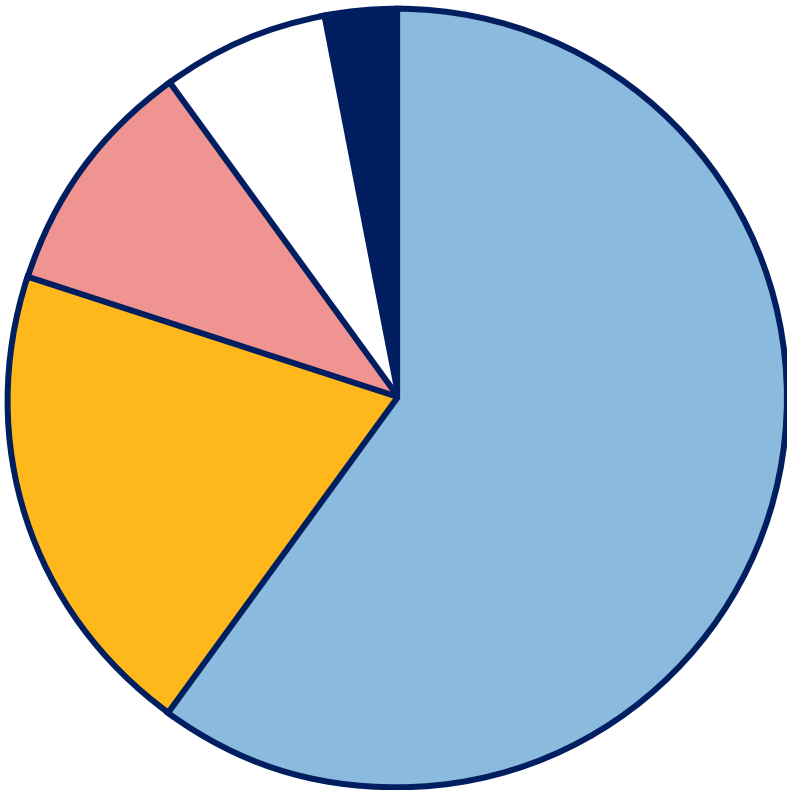

GRAPHS & CHARTS

Graphs and charts are often used as supporting evidence for a point of view.

Similar to icons, graphs and charts are styled with a Legacy Blue coloured keyline. Secondary colours are then used to aid viewers in distinguishing between different fields. If more than three colours are needed, white and Legacy blue can be implemented.

In rare cases where a large number of colours are needed, functional colours may be introduced.

06

PHOTOGRAPHY

HERO PHOTOGRAPHY — OVERVIEW

Hero photography features portrait and full-body shots of Vanessa. These shots will be the most prominent style of photography within the brand's communications.

Hero photography is shot in a studio on a black or white background. Images are then changed to black and white before being converted to duotone using Photoshop or through duotone.shapefactory.co if Photoshop is unavailable.

The photographer must be made aware that the shots will be converted to black and white in order to achieve rich mid-tones and a high contrast between dark and light tones.

When performing the duotone conversion always used pair Legacy Blue with a single secondary colour. Never attempt to mix secondary colours or introduce new colours.

HERO PHOTOGRAPHY — B2B & B2C

There are some key differences to keep in mind when working with hero photography across the two different channels.

Business-to-Business (B2B)
B2B photography has a much more serious tone than B2C. It is important that Vanessa has a professional presence in these shots.

B2B photography is always shot on black background. This ensures that Legacy Blue is the most prominent colour when the images are converted to duotone.

Business-to-Consumer (B2C)
B2C photography has much more relaxed feel than B2B. The tone of these shots is natural and unstaged. It is important that Vanessa appears almost oblivious to the camera, as if she is reacting to something she has just heard or interacting with someone outside the frame of the camera.

B2C photography is always shot on white background. This ensures secondary colours are most prominent when the images are converted to duotone.

Business-to-Business (B2B)

Business-to-Consumer (B2C)

BASIC PHOTOGRAPHY

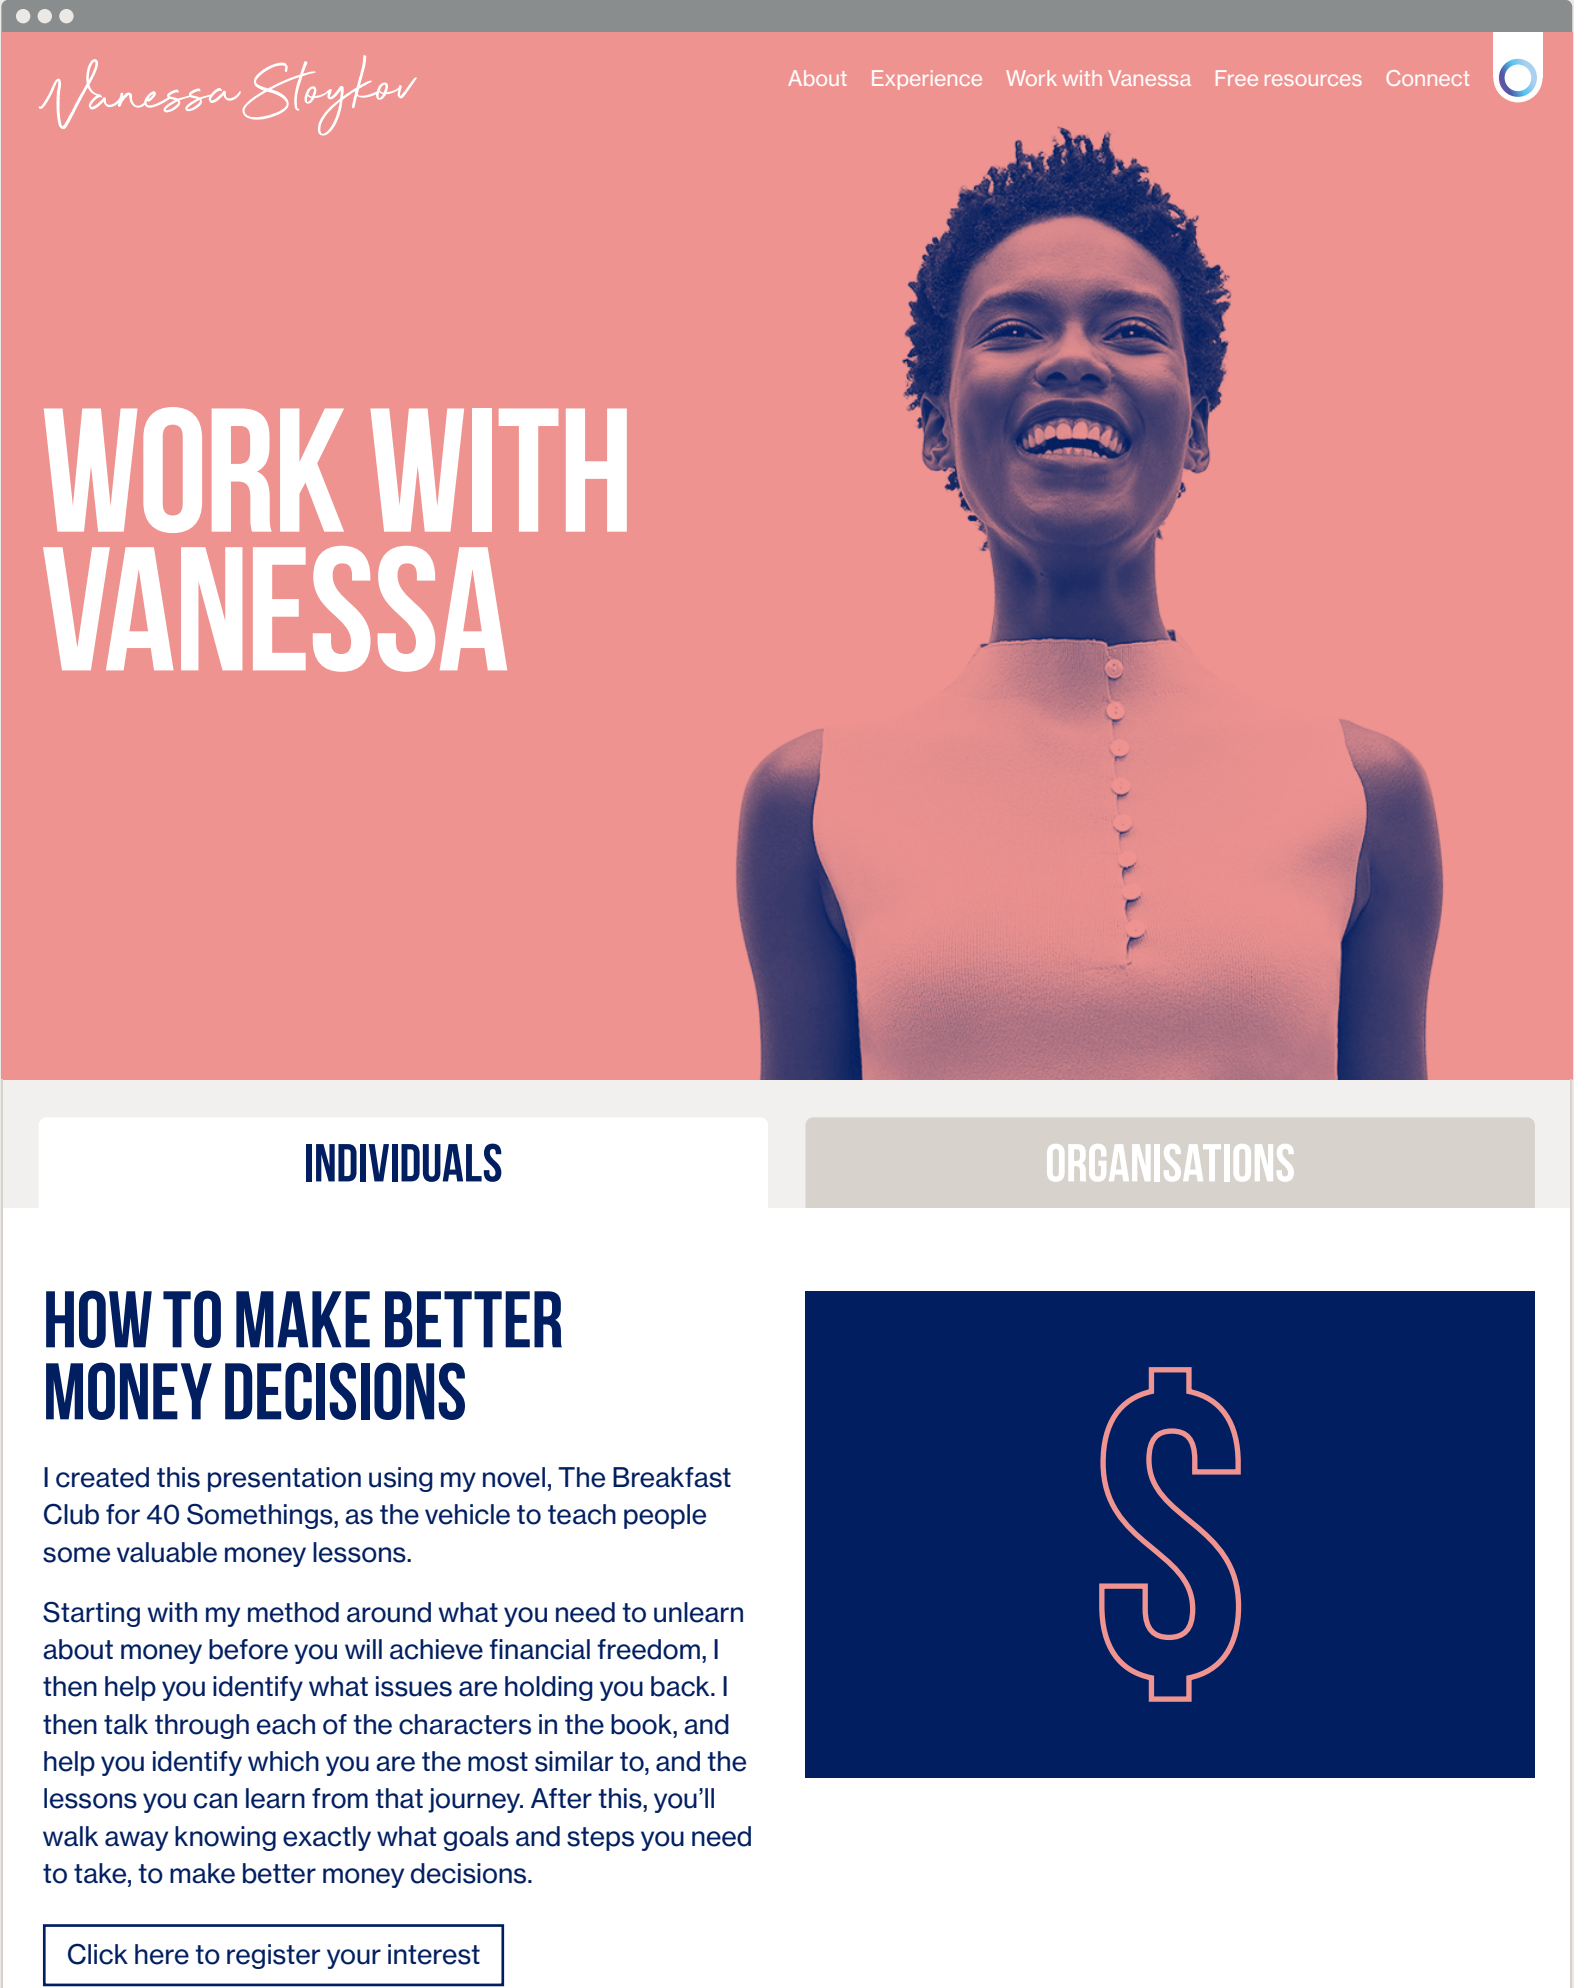

Basic photography is a little more candid than the hero photography and aims to give people more of an insight into Vanessa's life. Shots could involve Vanessa interacting with family and friends, speaking at an event or everyday moments at home or in the workplace.

Basic photography can be shot professionally or simply with a smartphone in order to capture a particular moment.
